**State of Mississippi
Public Water Systems Capacity Development Program
Triennial Report to the Governor**

**Mississippi Department of Health
Office of Health Protection
Bureau of Public Water Supply**

INTRODUCTION

The Safe Drinking Water Act Amendments of 1996 (SDWA) established the national Drinking Water State Revolving Fund (DWSRF) Program. That program allows the Environmental Protection Agency (EPA) to make capitalization grants to states, to in turn provide low cost loans to public water systems to help achieve or maintain compliance with SDWA requirements. Accordingly, the State Legislature (through Section 41-3-16, MS Code of 1972 Annotated) created what is now called the Drinking Water Systems Improvements Revolving Loan Fund (DWSIRLF) Program, to receive the federal DWSRF capitalization grants from EPA, and to provide the low cost loans to the State's public water systems to finance needed infrastructure improvements.

As a condition of receiving the DWSRF capitalization grants, the SDWA requires that each state implement a "capacity development program" to improve the technical, managerial, and financial capacity of the state's existing public water systems, and to prevent the creation of new public water systems that do not have the technical, managerial, and financial capacity to comply with current and future provisions of the SDWA. This report describes Mississippi's Capacity Development Program, and outlines the implementation results since the last Report to the Governor in 2002. Submission of this report represents a capacity development reporting milestone required by EPA to avoid withholdings from the FY-2006 DWSRF capitalization grant.

NEW PUBLIC WATER SYSTEMS CAPACITY DEVELOPMENT

To comply with the new systems capacity development requirements of the SDWA, the State Legislature revised the Mississippi Safe Drinking Water Law (Section 41-26-8, MS Code of 1972 Annotated) to require that all new community and non-transient non-community public water systems be approved by the Mississippi Department of Health (MDH) prior to beginning construction. During the review/approval process, MDH is required to ensure that each proposed new public water system has the technical and operational capacity to comply with all SDWA requirements. That is effectively the Program's first "control point," or point at which the State can exercise authority to ensure the demonstration of new system capacity. Another control point created by the State Law revision is the requirement that MDH, prior to approving a new public water system, have written certification from the Executive Director of Mississippi's Public Utilities Staff, that the new water system has the managerial and financial capacity to comply with all SDWA requirements. There have been no changes in the State's legal authority or control points, since the inception of the Capacity Development Program.

EXISTING PUBLIC WATER SYSTEMS CAPACITY DEVELOPMENT

Implementation of a capacity development program for existing public water systems is a much more difficult task than it is for new public water systems. The State of Mississippi has approximately 1,400 public water systems that are subject to the requirements of the SDWA, and the vast majority of these systems are very small with limited financial resources. Due to this limited financial capacity, it was impossible to develop a mandatory program in the State that would force these small systems to immediately make the necessary capital improvements to achieve the technical, managerial, and financial capacity needed to comply with the SDWA. The method implemented by MDH consists primarily of two components: 1) stringent enforcement of existing laws and regulations, and 2) implementation of capacity assessment rating and technical assistance procedures.

ENFORCEMENT - MDH stringently enforces the associated laws and regulations, such as those related to: 1) SDWA water quality standards, 2) waterworks operator licensure, 3) overloaded water systems, 4) corrosion control treatment facilities, and 5) water system board member training. By strictly enforcing these laws and regulations, MDH ensures that a safe supply of drinking water is provided by the existing public water systems with adequate technical, managerial, and financial capacity. This strict enforcement also encourages water systems without adequate capacity to seek alternate methods of compliance, including the pursuit of mergers with neighboring viable water systems. In most cases, these mergers (or "consolidations") result in the creation of much more capable public water systems, which do have the capacity to provide safe drinking water to their customers.

CAPACITY ASSESSMENT - MDH developed a Capacity Assessment Rating Program, to promote existing systems' capacity development. The technical, managerial, and financial capacity of each public water system is rated annually during the sanitary surveys conducted by MDH's regional engineers. The assessment is basically an "open book test," since the water systems are aware of the questions and the necessary requirements to receive credit during the assessment. The maximum rating possible is "5.0" and a rating of "0.0" is the minimum. The rating is determined using Capacity Assessment Forms (CAFs), which consist of three major sections: 1) Technical, 2) Managerial, and 3) Financial. Each section includes key questions designed to identify those things that a public water system must routinely accomplish in order to possess the technical, managerial, and financial capacity to comply with all current and proposed requirements of the SDWA and Mississippi's Safe Drinking Water Law.

The CAFs were developed by MDH in conjunction with an Advisory Committee consisting of representatives of various "stakeholder" organizations such as the Mississippi Rural Water Association, the Mississippi Municipal League, the Mississippi Water & Pollution Control Operators' Association, the RCAP-Community Resources Group, etc., as well as selected water system managers and operators from throughout the State. Each year, prior to the annual Advisory Committee meeting (typically held in April), the MDH staff reviews and evaluates the Program, discusses the strengths, weaknesses, and any related problems which may have arisen during the fiscal year, and determines any needed program changes to be reported to and discussed with the Advisory Committee. After input is obtained from the Advisory Committee at the annual meeting, MDH makes changes as needed to the Program strategy, the following year's CAFs, etc.

No major changes to the current capacity development strategy resulted from this year's Advisory Committee meeting; however, minor changes were made to the CAF instruction sheet to clarify how a system would receive credit for certain items. Appendix A contains copies of the three CAFs used during FY-2005. Included are the: 1) Standard Form – used for community public water systems, 2) Private Form – used for public water systems that are owned by private investors, and 3) Non-Transient Non-Community Form – used for public water systems that provide water to 25 or more of the same individuals, in a non-residential manner, on a daily basis (schools, industries, etc.).

TECHNICAL ASSISTANCE - MDH uses the Capacity Assessment Ratings to identify public water systems that are at risk of being unable to provide safe and adequate drinking water to their customers. Every effort is then made to provide technical assistance to improve those water systems. There is no cost to the water systems for such technical assistance, which is provided by MDH regional engineering staff, as well as technical assistance contractors paid with set-aside funds available from the DWSRF Capitalization Grants. MDH provides the technical assistance contractors an annual list of public water systems determined to be in need of assistance. The contractors then contact the water systems to determine specifics and to provide the assistance needed if the water systems so desire. Periodic reports are provided by the contractors to MDH to confirm that the assistance being provided is showing a benefit to the public water supplies of Mississippi.

MDH has found that the vast majority of public water systems are making efforts to improve, though as previously indicated, the capacity development program for existing systems is not mandatory. There are no specific penalties for a water system refusing assistance (which does occasionally occur) or failing to improve/maintain their Capacity Assessment Rating. However, such actions do have inherent consequences. The annual capacity assessment results for all systems are publicized. A primary goal of the program is for the public, not just the public water systems, to take an active role in assuring the quality of the State's water supply. The general public desires that their utilities be in compliance with laws and regulations, be viable for the future, and provide the best quality water at a reasonable cost. Customers of public water systems which have received a high capacity assessment rating are encouraged to contact their water system officials and congratulate them for an excellent job of operating and managing their water system. Likewise, customers of public water systems which have received a low rating are strongly encouraged to contact their water system officials and request a copy of the system's most recent Capacity Assessment Form. That form will quickly identify the areas where the water system needs improvement to become a more viable system. A lower rating could indicate that the system is more likely to be non-viable and, thus, unable to protect public health by complying with all SDWA requirements. Customers of such systems are also strongly encouraged to get involved with their water system to ensure that any needed improvements are completed.

Additional indirect consequences of failing to take action to improve Capacity Assessment Ratings include: 1) "losing" to neighboring water systems, and 2) receiving lower priority when seeking certain government funding. The Program has created a type of "peer pressure," in that many water systems consider the annual Capacity Assessment a competition, much like a sports tournament, where the competing systems strive to achieve a score higher than other systems in the area. This competition results in more viable water systems, which ultimately translates into a benefit to the customers and the general public.

Regarding funding priority, the State's DWSRF Loan Program contains priority ranking incentives related to Capacity Assessment Ratings, and other government agencies such as the Mississippi Developmental Authority (CDBG Program) have begun using a portion of the Capacity Assessment Rating to evaluate applicants for funding.

PROGRAM EFFICACY/PROGRESS

The efficacy of Mississippi's CD Program is best demonstrated by the actual results. No new public water systems approved within the last three years, have appeared on EPA's "Significant Non-compliers (SNC)" lists. During that same three-year period, Capacity Assessment Ratings on average have progressively increased. Appendix B contains a complete listing of the Technical, Managerial, Financial, and Overall/Average Capacity Assessment Ratings (scores) of Mississippi's public water systems for FY-2003, FY-2004, and FY-2005. Appendix C contains individual 3-Year Distribution Charts of the scores for each category. This information clearly reflects a trend in all categories away from lower scores (0 through 3) and toward higher scores (4 and 5) and, thus, toward improved capacity. Mississippi's Capacity Development Program continues to prove very effective in producing the desired result of protecting public health by improving the technical, managerial, and financial capacities of the public water systems throughout the State.

SUMMARY

Through the passage of proper legislation, the strict enforcement of existing laws and regulations, and the implementation of sound capacity assessment and technical assistance procedures, Mississippi has developed a Capacity Development Program which very effectively provides for higher levels of technical, managerial, and financial capacity in new and existing public water systems throughout the State. The program also provides an additional benefit to the public in the form of better utilization of assistance resources and funding. Though no significant changes or adjustments to the Program have been recently made, nor do any currently appear needed, the annual evaluation process, along with the Advisory Committee review and public involvement, will help to assure that any needed future change are identified and implemented in a timely manner.

FURTHER INFORMATION

If there are questions regarding the information presented in this report, or if you have recommendations for improving the public water systems capacity development program, please contact:

Keith Allen, P.E., Director
Bureau of Public Water Supply
P. O. Box 1700
Jackson, MS 39215-1700

Note that copies of this report can be obtained by calling 601-576-7518, or a copy can also be found on the Mississippi Department of Health website at www.msdoh.state.ms.us, by clicking on "Publications," then "Water Supply," then "Reports 2005."

Comments: _____

| Technical Capacity Assessment | Point Scale | Point Award |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------|
| [T1] 1) Was the treatment process functioning properly? [Y N] (i.e. Is pH, iron, free chlorine, etc. within acceptable range?) 2) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [Y N] 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 10 years? [Y N NA] (NOTE: All YESs or NAs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T2] Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [Y N] | N - 1pt. Y - 0pt. | |
| [T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [Y N] 2) Was log book up to date and properly maintained and did it show that AOA commitments were being met? [Y N] 3) Was the water system properly maintained at the time of survey? [Y N] 4) Did operator satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [Y N] (NOTE: All YESs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T4] 1) Was needed water system equipment in place and functioning properly at the time of survey? (No significant deficiencies/adequacy of security)? [Y N] (NOTE: Equipment deficiencies must be identified in survey report.) 2) Does water system routinely track water loss and were acceptable water loss records available for review by the regional engineer? [Y N] 3) Was a copy of this system's MSDH approved bacti site plan and lead/copper plan available for review during the survey and do bacti results clearly show this approved site plan is being used for all bacti monitoring? [Y N] (NOTE: All YESs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T5] Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [Y N] (based on operator information, customer complaints, MSDH records, other information) (NOTE: Must be documented on survey report) | N - 1pt. Y - 0pt. | |

|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-------------------------------|--------------------|
| [F1] Has the water system raised water rates in the past 5 years? [Y N] (NOTE: Point may be awarded if the water system provides acceptable financial documentation clearly showing that a rate increase is not needed) (i.e. revenue has consistently exceeded expenditures by at least 10%, etc.) | | Y - 1pt. N - 0pt. | |
| [F2] Does the water system have an officially adopted policy requiring that water rates be routinely reviewed and adjusted as appropriate and was this policy available for review during the survey? [Y N] | | Y - 1pt. N - 0pt. | |
| [F3] Does the water system have an officially adopted cut-off policy for customers who do not pay their water bills, was a copy of this policy available for review by the regional engineer, and do system records (cut-off lists, etc.) <u>clearly</u> show that the water system effectively implements this cut-off policy? [Y N] | | Y - 1pt. N - 0pt. | |
| [F4] Was a copy of the water system's officially adopted annual budget available for review by the regional engineer and does the water system's financial accounting system clearly and accurately track the expenditure and receipt of funds? [Y N] | | Y - 1pt. N - 0pt. | |
| [F5 - Municipal Systems] 1) Is the municipality current in submitting audit reports to the State Auditor's Office? [Y N] 2) Was a copy of the latest audit report available for review at the time of the survey? [Y N] 3) Does this audit report clearly show that water and sewer fund account(s) are maintained separately from all other municipal accounts? [Y N] (NOTE: Yes answer to all questions required to receive point.) | | All Y - 1 pt. Else - 0 pt. | |
| [F5 - Rural Systems] 1) Has the rural water system filed the required financial reports with the State Auditor's Office and were these reports available for review? [Y N] 2) Does the latest financial report show that receipts exceeded expenditures? [Y N] (NOTE: Yes answer to both questions required to receive point) | | All Y - 1 pt. Else - 0 pt. | |
| FINANCIAL CAPACITY RATING = [] (Total Points) | | | |

**Mississippi State Department of Health
Division of Water Supply
Capacity Development Rating Form Assessment Criteria**
01 July 2003 - 30 June 2004

Technical Capacity

- T1 (1)** **Was the water treatment plant functioning properly?** Corrosion control plants: target pH (approximately 8.4 or Langlier Index, 7-8 if adding phosphate,) Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide free residual throughout system, spot checked on system (beginning FY 05 : Fluoride: 0.8 -1.2 mg/l concentration ())
- T1 (2)** **Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, test results for each backflow preventer on system
- T1 (3)** **Were records available showing that all water storage tanks have been inspected, cleaned and painted (if needed) within past 10 years?** Maintenance contracts, tank inspection reports, painting contract, operator can inspect own tank if he writes a report and/or takes pictures
- T2** **Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording
- T3 (1)** **Was the certified waterworks operator or authorized representative present for survey?** Operator or representative must be present unless emergency, operator shouldn't miss two in a row
- T3 (2)** **Log book up to date and properly maintained and AOA commitments met?** Log book: CI2 recorded as required, pH, Fe, and Fluoride if applicable, major events recorded (fix major leaks, replace chlorine cylinder, equipment repairs, etc.) Part time operator must make required entries in log book to show AOA commitments are met. Major events can be recorded separately (work orders)
- T3 (3)** **Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, tanks painted, plant presentable
- T3 (4)** **Did the operator satisfactorily demonstrate ability to perform all water quality tests required to properly operate this system?** Must have applicable test kits, fresh reagents, and able to perform tests (including fluoride if applicable). Regional engineer may perform tests to verify operator's results. Beginning FY 05: to include phosphate and Fluoride
- T4 (1)** **Was needed water system equipment in place and functioning properly (no significant deficiencies noted)?** Adequate security: locked fence around wells/treatment plant (6' or 5' + barbed wire at top), locked hatches on water storage tanks (do not have to climb elevated tank). Required equipment in place (i.e., phosphate feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report. (This section may be expanded after groundwater rule becomes effective to include regulated significant deficiencies)
- T4 (2)** **Does water system routinely track water loss and were acceptable records available for review?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly
- T4 (3)** **Was a copy of approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed
- T5 (1)** **Was there any indication that the water system is/has been experiencing low pressure?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report

Managerial Capacity

- M1** **Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, CCR data sheet, copy of CCR report
- M2 (1)** **Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Subdivision policy (written procedure to give developers requiring MSDH approval, construction inspections, final approval before meters installed, who will collect bacteriological samples), Flushing program (Preemptive flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept)
- M2 (2)** **Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy), does not apply to Municipalities with population over 2500
- M2 (3)** **Does Board meet monthly and were minutes available for review?** Allow quarterly with full time manager
- M3** **Has the water system had any SDWA violations in the past 24 months?** System and Regional Engineer's records
- M4** **Has the water system developed a long range improvement plan and was this plan available for review?** hydraulic analysis, engineering report, or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years.
- M5** **Does the water system have the ability to provide water during emergencies?** Credit given for generators, can give credit for emergency tie-ins if hydraulics work (beginning FY 05 credit not given for right angle drive w/o motor connected, must operate during inspection or have routine operation schedule)

Financial Capacity

- F1** **Has the water system raised rate in 5 years?** Credit also allowed if revenue exceeds expenditures (excluding out of pocket for major improvements) by 10%
- F2** **Does the water system have an official policy requiring rates routinely reviewed and adjusted if necessary?** Must be in minutes showing adopted
- F3** **Is the water system following an official cut off policy?** Must be published (in minutes or on bills), must follow policy (cut off customers who by policy should be cut off)
- F4** **Was a copy of system's adopted annual budget available for review and does financial accounting system track receipts and expenditures?** Must provide copy of budget and balance sheet for review
- F5
(Municipal)** **Is the municipality current in submitting audit reports to State Auditor, available for review, water and sewer separate from other accounts?** List of violators, copy of audit report in records, documentation showing water and sewer separate
- F5
(Rural)**
- 1) Has the water system filed financial report with State Auditor?**—List of violators; copy of form in records
 - 2) Does the latest report show that receipts exceed expenditures?** Excluding out of pocket for major improvements, depreciation

- T2** **Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording
- T3 (1)** **Was the certified waterworks operator or authorized representative present for survey?** Operator or representative must be present unless emergency, operator shouldn't miss two in a row
- T3 (2)** **Log book up to date and properly maintained and AOA commitments met?** Log book: CI2 recorded as required, pH, Fe, and Fluoride if applicable, major events recorded (fix major leaks, replace chlorine cylinder, equipment repairs, etc.) Part time operator must make required entries in log book to show AOA commitments are met. Major events can be recorded separately (work orders)
- T3 (3)** **Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, tanks painted, plant presentable
- T3 (4)** **Did the operator satisfactorily demonstrate ability to perform all water quality tests required to properly operate this system?** Must have applicable test kits, fresh reagents, and able to perform tests (including fluoride if applicable). Regional engineer may perform tests to verify operator's results. Beginning FY 05: to include phosphate and Fluoride
- T4 (1)** **Was needed water system equipment in place and functioning properly (no significant deficiencies noted)?** Adequate security: locked fence around wells/treatment plant (6' or 5' + barbed wire at top), locked hatches on water storage tanks (do not have to climb elevated tank). Required equipment in place (i.e., phosphate feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report. (This section may be expanded after groundwater rule becomes effective to include regulated significant deficiencies)
- T4 (2)** **Does water system routinely track water loss and were acceptable records available for review?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly
- T4 (3)** **Was a copy of approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed
- T5 (1)** **Was there any indication that the water system is/has been experiencing low pressure?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report

Managerial Capacity

- M1** **Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, CCR data sheet, copy of CCR report
- M2 (1)** **Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Subdivision policy (written procedure to give developers requiring MSDH approval, construction inspections, final approval before meters installed, who will collect bacteriological samples), Flushing program (Preemptive flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept)
- M2 (2)** **Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy), does not apply to Municipalities with population over 2500
- M2 (3)** **Does Board meet monthly and were minutes available for review?** Allow quarterly with full time manager
- M3** **Has the water system had any SDWA violations in the past 24 months?** System and Regional Engineer's records
- M4** **Has the water system developed a long range improvement plan and was this plan available for review?** hydraulic analysis, engineering report, or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years.
- M5** **Does the water system have the ability to provide water during emergencies?** Credit given for generators, can give credit for emergency tie-ins if hydraulics work (beginning FY 05 credit not given for right angle drive w/ o motor connected, must operate during inspection or have routine operation schedule)

Financial Capacity

- F1** **Does water system have PSC Certificate of Need and Necessity?** Copy of tariff or other PSC filings
- F2** **Has the water system petitioned PSC for rate increase within past five years?** Copy of PSC filing, credit given if income exceeds expenditures by 10%
- F3** **Is the water system following an official cut off policy?** Should be in tariff, must follow policy (cut off customers who by policy should be cut off)
- F4** **Was a copy of system's adopted annual budget available for review and does financial accounting system track receipts and expenditures?** Must provide copy of budget and balance sheet for review
- F5** **Does the system routinely file Annual Report with the PSC and copy available for review?** Must have copy available
Does the latest Annual Report show receipts exceed expenditures? Exclude major out of pocket expenses (paid cash for new well, etc.)

**MISSISSIPPI Division of Water Supply
FY 2005 Public Water System Capacity Assessment Form**

NON-TRANSIENT, NON-COMMUNITY FORM

NOTE: This form must be completed whenever a routine sanitary survey of a public water system is conducted by a regional engineer of the Division of Water Supply.

PWS ID#: _____ Class: _____ Survey Date: _____ County: _____

Public Water System: _____ Conn: _____

Certified Waterworks Operator: _____ Pop: _____

CAPACITY RATING DETERMINATION

Technical (T) Capacity Rating: [_____] Managerial (M) Capacity Rating [_____]

| Technical Capacity Assessment | Point Scale | Point Award |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|--------------------|
| [T1] 1) Was the water treatment process functioning properly? [Y N] (i.e. Is pH, iron, free chlorine, etc. within acceptable range?) 2) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [Y N] 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 10 years? [Y N NA] (NOTE: All YESs or NAs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T2] Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [Y N] | N - 1pt. Y - 0pt. | |
| [T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [Y N] 2) Was log book up to date and properly maintained and did it show that AOA commitments were being met? [Y N] 3) Was water system well maintained at time of survey? [Y N] 4) Did operator satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [Y N] (NOTE: All YESs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T4] 1) Was needed water system equipment in place and functioning properly at time of survey? (No significant deficiencies/adequacy of security) [Y N] (NOTE: Equipment deficiencies must be identified in survey report.) 2) Does water system routinely track water production and were acceptable water production records available for review by the regional engineer? [Y N] 3) Was a copy of this system's MSDH approved bacti site plan and lead/copper plan available for review during the survey and do bacti results clearly show this approved site plan is being used for all bacti monitoring? [Y N] (NOTE: All YESs required to receive point) | All Y - 1 pt. Else - 0 pt. | |
| [T5] Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [Y N] (based on operator information, customer complaints, MSDH records, other information) (NOTE: Must be documented on survey report) | N - 1pt. Y - 0pt. | |

Mississippi State Department of Health
Division of Water Supply
Capacity Development Rating Form Assessment Criteria
01 July 2003 - 30 June 2004

NONCOM FORM

Technical Capacity

- T1 (1)** **Was the water treatment plant functioning properly?** Corrosion control plants: target pH (approximately 8.4 or Langlier Index, 7-8 if adding phosphate,) Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide free residual throughout system, spot checked on system Fluoride: 0.8 -1.2 mg/l concentration (beginning FY 05)
- T1 (2)** **Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, test results for each backflow preventer on system
- T1 (3)** **Were records available showing that all water storage tanks have been inspected, cleaned and painted (if needed) within past 10 years?** Maintenance contracts, tank inspection reports, painting contract, operator can inspect own tank if he writes a report and/or takes pictures
- T2** **Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording
- T3 (1)** **Was the certified waterworks operator or authorized representative present for survey?** Operator or representative must be present unless emergency, operator shouldn't miss two in a row
- T3 (2)** **Log book up to date and properly maintained and AOA commitments met?** Log book: CI2 recorded as required, pH, Fe, and Fluoride if applicable, major events recorded (fix major leaks, replace chlorine cylinder, equipment repairs, etc.) Part time operator must make required entries in log book to show AOA commitments are met. Major events can be recorded separately (work orders)
- T3 (3)** **Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, tanks painted, plant presentable
- T3 (4)** **Did the operator satisfactorily demonstrate ability to perform all water quality tests required to properly operate this system?** Must have applicable test kits, fresh reagents, and be able to perform tests (including fluoride if applicable). Regional engineer may perform tests to verify operator's results. Beginning FY 05: to include phosphate and Fluoride
- T4 (1)** **Was needed water system equipment in place and functioning properly (no significant deficiencies noted)?** Adequate security: locked fence around wells/treatment plant (6' or 5' + barbed wire at top), locked hatches on water storage tanks (do not have to climb elevated tank). Required equipment in place (i.e., phosphate feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report. (This section may be expanded after groundwater rule becomes effective to include regulated significant deficiencies)
- T4 (2)** **Does water system routinely track water loss and were acceptable records available for review?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly
- T4 (3)** **Was a copy of approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed
- T5 (1)** **Was there any indication that the water system is/has been experiencing low pressure?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report

Managerial Capacity

- M1** **Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, CCR data sheet, copy of CCR report
- M2** **Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have Job Description for Employees (employee handbook) and Emergency or contingency plan (chain of command, phone numbers, etc.), plus at least one of the following: Construction policy (written procedure requiring MSDH approval, construction inspections, final approval, who will collect bacteriological samples), Flushing program (Preemptive flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept)
- M3** **Has the water system had any SDWA violations in the past 24 months?** System and Regional Engineer's records
- M4** **Has the water system developed a preventative maintenance schedule?** Maintenance schedule for : wells (including annual pump tests), service pumps, etc. with recommendations and corrective action.tank inspections Copy available for review
- M5** **Does the water system have the ability to provide water during emergencies?** Credit given for generators, can give credit for emergency tie-ins if hydraulics work (beginning FY 05 credit not given for right angle drive w/o motor connected, must operate during inspection or have routine operation schedule)
